

Black Horse Eurofighter EF2000 Typhoon 1238mm fr 120mm Impeller

Art.Nr.: BH165

The Black Horse Ef-200 Typhoon is a beautifully well-presented scale model of the iconic Eurofighter fighter jet. The Eurofighter is a twin-engine, canard-delta wing multirole aircraft used by many air forces including the RAF, German Air Force, Italian Air Force and Spanish Air Force it has become a key tool in Europe's airborne arsenal.

The structure is built from CNC cut balsa and ply all aligned by hand on jigs for accuracy. This traditional method results in a lightweight and strong airframe ideally suited to EDF fans. There are 4 large hatches for easy access to the onboard electronics during assembly or maintenance. This kit also comes supplied with CNC metal oleo struts ready for your electric retracts (F-RMXER040M and F-RMXER040N are ideal).

Using a large 120mm EDF combined with a large 12S Li-Po this jet is no slouch and really rips through the sky. The powerful control make aerobatics easy and provide impressive authority in a wide range of flight speeds. When it comes time to land thanks to the large wing area she also excels at slower speed giving gentle handling on approach.

Finished in the beautiful 'Battle of Britain' anniversary scheme this is a real conversation starter at any local flying club.

Technische Daten*	
Spannweite mm	1238mm
Lnge mm	1652mm
Gewicht g	7200g
R/C Funktionen	(9 Kanal / 10 Servos)

Antrieb / Elektro (empf.)	120mm Brushless Impellereinheit Brushless Regler 15A0 HV
Sonderzubehr (empf.)	LiPo Akku SLS 6300mAh - 22,2V (2x) Servo MASTER DS3012 MG Einziehfahrwerk XL RMXER040M Einziehfahrwerk XL (lenkbar) RMXER040N
