

Super Flying Model Hawk T-Tail EP Segler ARTF 2000mm

Art.Nr.: A-SFMEP30T

The SFM Hawk T-Tail ARTF glider is a perfect introduction into radio control gliding providing an ARTF model with superb flying qualities featuring an all balsa constructed electric glider with aileron and semi-transparent iron-on covering which is both strong and lightweight.

A pre-built and hinged assembly is easy and has forgiving characteristics when in flight, ideal fun for beginners. The addition of a T-Tail producing slightly different flying characteristics than the conventional SFM Hawk with plenty of clearance for those special landings, think of a barley field!

Spezifikation
