

Bay-Tec XPower F3820/10 - 1050KV - Brushless Motor

Art.Nr.: 099F382010

Replaces an engine of about 5.0/6.5cc

Output power cables in the axis at the rear of the engine, perfect for easy installation in the narrow fuselage nose of sailplanes.

XPower F3820/10

Specifications:

- Recommended number of cells: 3-4 LiPo
- KV: 1050 RPM/V
- Max current: 42A (60")
- Internal resistance: 39mOhm
- Dimensions: 38.2x47.5mm
- Shaft diameter: 5.0mm
- Weight: 153g approx.
- Recommended props: 8.5x5-11x6"

Measures:

- Prop: AERONAUT CAM CARBON 11x6"
- Controller: 60A Brushless
- Battery pack: Lipo 4000mAh 11.1v 3S
- RPM: 9600
- Current drain: 45A
- Thrust: 2150g

PREIS:

63,73 EUR
