

VQ Model P-38 Lightning 2100mm ARF silber 2 Mot

Art.Nr.: VQA024

This is the latest model of Vietnamese company VQ Model well known for its well designed production which flies perfectly. The P-38 is no exception to the tradition! It has a great look and will create Wow effect at the airfield with an investment in terms of hours of work, relatively low, given by advanced pre-fabrication of the kit and despite the fact the plane is voluminous and complex.

Great feature, the flaps are fowler type, like the real one, ie a mechanism allows at the same time, to lower and to extend them out of the wing, thus allowing to increase the surface of the wing when it is needed in the takeoff and landing phases. All the linkages and mechanism are already installed for you at the factory.

Sehr schne und detaillierte P-38 Lightning.

Sehr schn bedruckte Folie.

Technische Daten:

Spannweite:.....**2100mm**
Lnge:.....1460mm
2-Takt-Motor:.....10ccm
4-Takt-Motor:.....15ccm
