

VA-Model PITTS S2CX 1010mm ARF

Art.Nr.: VA-Pitts2SCX

Wingspan	1010 mm
Lenght	1010 mm
Weight	650-740 g (dep. on the RC equipments)
Servos	3-4
Material	EPP
Functions	Rudder, Elevator, Ailerons, Motor
Level	ARF

3D/aerobatic special of GENERATION II with a very realistic, dynamic appearance and attractive graphic design. Do you like 3D aerobatic, hanging, harier flighth? Pitts is ideal model for you, it's model for those who want an aerobatic plane with fantastic flying, aerobatic characteristics and also a likeable design. The plane is produced by CNC technology from EPP foam. It has a wide speed range and pleasant flying behaviour, however Pitts is intended primarily for advanced pilots.

The fuselage is spatial and it is completely assembled in the kit. Almost all RC components can be install inside the fuselage, thus avoiding interference with the aesthetic appearance of the model.
