

Topmodel CZ Miss Tractor ARF - 2840mm - Schlepp Maschine

Art.Nr.: 02095ARF

Very new towing model built for air work (photography, schooling, streamer, etc...).

Possibility of using 60 to 80cc engines according to the required flight type. With 80cc gasoline engines, it is really possible to tow very large sailplanes. The flaps are particularly efficient; it is possible to direct them until 90° thanks to the special hinges system delivered in the kit.

Real V/STOL capacities.

The robust landing gear hyper resists the worse treatments and makes it possible to take off from summary grounds.

Thanks to its perfect geometry and to profile NACA 4412, this plane is an example of stability and will make wonder in all the tasks you will ask it.

A new standard was born...

Our prototype is been driven by an engine MVVS 80 IRS.

If you are interested in a different color combination than we offer, please contact us.

Technical specification:

							
2840	1990	9-11kg	123,2dm ²	73-89,3g/dm ²	NACA 2415	60-80cc	8-10 channel 8-10 servos
mm	mm						

Kit contents:

- All built up ply and balsa fuselage, covered with Qualittsfolie
- All build up open framework wing, ready with ailerons and flaps prepared, covered in Qualittsfolie
- Fiberglass gelcoated engine cowl
- Main landing gear from aluminium
- Complete tailwheel assembly
- First quality hardware: Control links, fiberglass control horns, special fiberglass hinges, king size ball links, radio hatch with latch, special

removable servo mounts

- CNC cut vynil stickers
- Step by step building instructions

PREIS:

999,90 EUR
