

Topmodel CZ Swift S1 ARF - 3730mm - Deluxe Version

Art.Nr.: 02099DLARF

The wings are equipped with air-brakes but also with camber flaps. These flaps have a longer length compared to reality and are divided into 2 parts. Thus, it is possible to use these 2 parts, together, like gigantic ailerons but also as camber flaps. This makes possible to make the Swift even more general-purpose and powerful in aerobatic.

Swift S1 ARF (covered with Qualit?tsfolie?).

The model is designed and manufactured in Czech Republic. Spare parts are in stock.

De-luxe version:

- Fully built-up and matched model.
- Ready fiberglass FUSELAGE with already installed sliding cabin, fiberglass seat, dashboard panel, connectors, wiring for aileron servos and airbrakes and wing joiner casing. Further rudder and bowden are fixed. Retract gear (bay doors installed), tailwheel and tow hook already installed.
- WINGS with metallic airbrakes installed. Wing fixing device already installed and servos connector also.
- Stickers are stucked on model.

Technical specification:

						
3730 mm	1740 mm	5,8-6,8 kg	85,2 dm ²	68-79,8 g/dm ²	HQ 1,5-12	A-P-D-AF-TR-CR
