Empf. Motor: **Robbe RO-POWER TORQUE 3522 1000 K/V BRUSHLESS MOTOR**

General-purpose electric sailplane equipped with flaps for the entertaining flight

The OLYMPIC is a sailplane which you will use everywhere and by all times
.....

Easily transportable with its wing in 2 parts and its dismountable V-tail.

With the recommended drive train, it climbs to the trees! and has a huge autonomy!

Its wing, completely planked with MH32 airfoil and a modest surface allows fantastic performances which are still raised by a particularly low flying weight. Thus, this sailplane is as well excellent in dynamic flight as in thermal flight!

A must to be tested as fast as possible.

Lieferumfang

- Light fuselage moulded in white tinted epoxy fiberglass
- Two piece wing foam core sheeted covered with Qualit?tsfolie? with ailerons and flaps
- Tailplane are made in a balsa framework with carbon spar and leading edges and covered with Qualit?tsfolie?
