Topmodel Olympic Elektro Segler - 2,3m - ARF - V-Leitwerk

Art.Nr.: 02084ARF
Performance sailplane with controlled ailerons, flaps and Vtail surfaces.

A two-piece wing is made of polystyrene-balsa construction and V-tail surfaces are reinforced by carbon fibre are easily demountable.

Thanks to low weight and apllied aerofoil is this sailplane intended for recreation thermal flying.
Suitable for those looking for a good multi-use electric sailplane.

Technische Details:

RC accessories: 4 chanels with 4servos
*recommended:
Empf. Motor: Robbe RO-POWER TORQUE 35221000 K/V BRUSHLESS MOTOR

General-purpose electric sailplane equipped with flaps for the entertaining flight
The OLYMPIC is a sailplane which you will use everywhere and by all times

Easily transportable with its wing in 2 parts and its dismountable V-tail.
With the recommended drive train, it climbs to the trees! and has a huge autonomy!

Its wing, completely planked with MH32 airfoil and a modest surface allows fantastic performances which are still raised by a particularly low flying weight. Thus, this sailplane is as well excellent in dynamic flight as in thermal flight!

A must to be tested as fast as possible.
Lieferumfang
