

Redox Tx-ONE 2,4GHz 3CH Car-Sender (incl.Rx-ONE Empfänger)

Art.Nr.: RDX-TX1

3-channel Redox Tx-ONE transmitter designed to work with RC models of cars and motorboats (as well as other land/water 2-3 channel models). Light and handy, intuitive and easy to use, perfect for beginners and intermediate modellers. Thanks to the ergonomically designed handle, it is suitable for both younger and older users (comfortable grip regardless of the size of the hand). The steering wheel is lined with a soft and "grippy" foam to ensure precise steering.

It has 2 proportional channels (throttle and wheel steering channel) and an additional, "switch" channel 3 (pos. 0/1), which makes it possible to control, for example, glow models with mechanically switched reverse gear, or models with an on / off lights or other functions. Additionally, transmitter is equipped with reverse functions (for channels 1 and 2), precise trimmers, Dual/Rates and EPA mixers for channel 2.

The transmitter is powered by 4 AA size batteries or 4 LR6 alkaline batteries (not included in the set), mounted in a basket at the bottom of the transmitter.

The transmitter is sold as a set with a compatible Redox Rx-ONE receiver.

Specification:

Number of channels: 3

Modulation: 2.4GHz FHSS

Operating voltage: 4.8 - 6.0 V

Weight: 388g

Mixers: Reverse, EPA, D / R, TRIM

Fail-Safe: YES (in pair with the Rx-ONE receiver)

Power supply: 4.8-6.0V (4x AA rechargeable battery or 4x LR6 alkaline batteries)
