
RC-Factory Crack Yak XL - 1080mm

Art.Nr.: RCF-T67

The biggest version of the legendary Chris Jewett designed model. With legacy of all the good features of it's predecessors, especially the incredible agility and neutral control response, this model is probably the best one in this size. The full flying stab adds some extra spice to all the possible maneuvers you can fly with it, including loops practically around it's center of gravity.

With tuned down control throws this will be still a smooth and docile 3D trainer for pilots who have just emerged from their beginner phase.

Hauptmerkmale

- wingspan 1080 mm
