

RC-Factory Super Extra L Kit - 1000mm - Bull

Art.Nr.: T20

The **Big Super Extra** is the successor to our successful Edge 540 V3. We paid attention to the details to move this plane to the step forward again.

This is a first model of a new line of 1m wingspan EPP models with increased stiffness and torsion rigidity. We have beefed up everything, but especially the torsion rigidity of the fuselage - so that fuselage twist in fast rolling maneuvers is now totally a thing of the past. The wing is thicker too, for better tolerance of the most insane, high-G stunts.

This model can also take a bigger motor up to the 2217 size, although it already flies nicely with 2212 motors. If you prefer insane power in your 3D models, this one is the ticket.

Outdoor Series:

If you prefer bigger models with fully airfoiled wing, you can't make a mistake with these. Developed by some of the best 3D pilots for a combination of 3D capability and easy, predictable handling.

Hauptmerkmale

- Wing span: 1000 mm
- Length: 1030 mm
- Weight: ca 500g depending on the equipment used
- Motor: 2212 - 2217, 150 - 200W
- Servos: 4x 9 - 15g
- Receiver: micro, mini
- ESC: 25-35A.
- Battery pack: 3s 1000 - 1500 mAh
- Propeller: 10x4.6 APC

Inhalt

- Kit including carbon landing gear, hardware, without equipment set - see photo

Recommended equipment sets (motor, servos, ESC, propeller, batteries) can be found below in accessories.
