

FMS Twin 70mm EDF J-11 PNP - 1110mm

Art.Nr.: FMS132P

The J-11 fighter is a domestic version of the Su-27 that the People's Republic of China authorized from Russia. It is a third-generation fighter. The Shenyang Aircraft Company established a production line, and Russia supplied the main parts and systems to form production and assembly capabilities. Later, China carried out independent research and development on its basis, and derived newer models such as J-11B and J-11BS.

Superlative dark gray paint, smooth aerodynamic contour, outlines a unique sense of modern technology- FMS dual 70mm EDF J-11.

In terms of performance, Dual 70mm inrunner 12 bladed EDFs and high-quality 80A ESCs provide ample thrust for high speed, excellent vertical performance and resonating turbine engine sound. In addition, the pre-installed metal gear servos and ball link style control horns make for more responsive and precise operation.

In terms of appearance, FMS captures the essence of this fighter. Functional restoration, such as large size airbrake, LED navigation lights & landing lights, full-motion tail, landing gear door with sequencing effect, retractable landing gear system that can resist hard landings, static restoration such as cockpit details, panel lines, detachable ordnance, pilot, and highly recognizable trim scheme, all these details combine to make the FMS J-11 stand out on the tarmac and in flight.

Get yourself a J-11 and bring new excitement to the flying field!

Features

- Dual 70mm inrunner 12 bladed EDFs and high-quality 80A ESCs provide ample thrust.
- High degree of reduction of dynamic and static details.
- High-quality wear-resistant rubber tyres.
- Electronic retracts with locked-rotor mode and over current protection.
- Large-size bearings are used in the wheel hub for take-offs and landings on rough roads.
- Pre-installed, newly designed ball link style control horns for more throw.

Specifications

Wingspan: 1110mm

Overall Length: 1640mm

Flying Weight: Around 4380g

Motor Size: 3060-KV1900*2

ESC: 80A*2

Servo: 13g*4, 9g*8

Radio: 6 Channel

CG (center of gravity): 145-150mm

EDF: 70mm Pro Ducted Fan 12-blade

Recommended Battery: 6S 5000-6000mAh 50C

Aileron: Yes

Elevator: Yes

Rudder: Yes

Flaps: Yes

Retracts: Yes

Approx. Flying Duration: 4 minutes

Minimum Age Recommendation: 14+

Experience Level: Intermediate

Assembly Time: 20 minutes

Wing Area: 36.2dm

PREIS:

819,99 EUR

inkl. 19 % MwSt. zzgl. **Versandkosten**
