Seagull Aviat A-1C Christen Husky 2030mm V2 15-20cc ARF

Art.Nr.: BT-SEA180N-V2

Seagull SEA180N - Aviat A-1C Christen Husky 203cm 15-20cc Gas ARF

The full-scale Aviant Husky (formerly Christen Husky) has been one of the best-selling light aircraft designs since certification was awarded in 1987. This 203cm wingspan Seagull scale Husky model is manufactured from choice select balsa and plywood. Masterfully finished with genuine Oracover film covering for long-lasting durability and easy repairs. The two-piece plug-in wings feature barn-door ailerons and large flaps, for outstanding control. Easy to transport thanks to the 2 piece wing, quick connect wing struts and compact transport size. A convenient top hatch built-in makes glow or electric power an easy setup.

- Upgrade structures and contructions to accept gas/petrol engines and electric motor
- Compatible LED lights
- Two-piece plug-in wings with anodized aluminum wing tube
- Airfoil-shaped wing struts with matching paint finish
- Scale-type flap and aileron hinges
- Scale landing gear with matching paint finish and Air Rubber Wheel 4.5”
- Magnetically-secured top hatch
- Upgrade structures and construction to accept gas engine and electric motor
- High quality balsa and balsa plywood, these make light weight construction
- Accurate scale outline and appearance
- Pilot, pilot seat, and instrument panel decal included to increase scale appearance
- Two-piece, plug-in wings with aluminum tube joiner to allow convenient transport/storage
- Quick connect/disconnect wing struts simplify field assembly and transport/storage
- Adjustable EP motor box included for easy electric motor power options
- Functional flaps for enhanced flight characteristics and realism

- Fiberglass control horns are included for cleaner installation
- Painted fiberglass cowling and wheel pants matches film covering nicely
- All necessary hardware included
- Spinner included (2.25″)
