

UDI-RC U830 Mini RC Hand Sensor Quadcopter mit Gyro

Art.Nr.: UDIU830

This is the new **UDI-R/C U830 Mini RC Hand Sensor Quadcopter**. The U830 features a very unique and very cool controller. Using the hand sensor transmitter, the quad is controlled by both your hand movement **and** the control stick. The stick controls Left/Right rotation and the throttle, while the movement of your hand (with the controller in it) controls forward/backward/ left/right motions. It also features a small button that sends your quad into a 360 degree spin on demand. Thanks to the latest 6-axis gyro, the U830 quad is extremely stable. All you need are three AAA batteries for the transmitter and you're ready to fly. The UDI Hand Sensor Quad is loads of fun!

- Durable Sleek Design
- 4-Channel 6-Axis with Gyro Stabilization for Stable Flight
- Perform 360-Degree Flips, Stunts and Spins
- **REQUIRES:** Only 3 "AAA" Alkaline Batteries for the Transmitter
