

RC-Factory Clik ICL Blau 830mm Indoor control-line Model

Art.Nr.: S47

CLIK ICL - indoor control line aerobatic model

CLIK ICL (Indoor Control Line) is a completely new generation of control line models, building on the proven and popular Clik. From the initial design, we have redesigned the model to be as neutral and stable as possible, with clean, smooth flight characteristics - exactly as required for aerobatic flying. The result is a thoroughbred indoor aerobatic model that will be enjoyed by both novice pilots and experienced competitors.

The construction of 4 mm EPP supplemented with carbon reinforcements ensures an ideal combination of low weight, durability, and precision. Leading experts and pilots Roman Rado and Luk Voseck participated in the development, thanks to which the CLIK ICL is fine-tuned down to the smallest detail. The ergonomic handle with five-meter Kevlar cables is not included in the package, but you will find it right below the product in the accessories section.

Together with the model, we recommend using the specially developed Volta 20A CL controller, which we created specifically for tethered models. It offers not only a governor function to maintain constant speed, which is crucial for tethered models (we recommend an optimal 5700 RPM for CLIK ICL), and a very smooth start-up, but also an integrated timer - a unique solution that you won't find in other controllers. Setup is extremely simple thanks to the JetiBox or transmitter telemetry, where you can easily adjust flight time, delay, and more according to your preferences.

The CLIK ICL is not just another model in the line - it is a new standard in the category of indoor tethered aerobatics.

Hauptmerkmale

- Wingspan: 830 mm
- Length: 890 mm
- AUW: 120-130 g
- Motor: 2204/1800kv (nicht im Lieferumfang)
- ESC: 15-20A (VOLTA 20A CL) (nicht im Lieferumfang)
- Akku: 2s 450mAh (nicht im Lieferumfang)
- Propeller: 9 x 4.6 (nicht im Lieferumfang)

Inhalt

- Kit with Hardware , without equipment set - see photo

Recommended equipment sets (motor, servos, ESC, propeller, batteries) can be found below in accessories
