

VA-Models Elite 1050mm ARF EPP

Art.Nr.: VA-003

Technical specification:

Wingspan:	1050 mm
Length:	1070 mm
Flight weight:	620-700 g (dep. on the RC equipments)
Servos:	4
Material:	EPP
Functions:	Rudder, Elevator, Ailerons, motor
Level:	ARF

Product description:

3D/aerobatic special of GENERATION II with a very realistic, dynamic appearance and attractive graphic design by airbrush technology. The plane is produced by CNC technology from EPP foam. Elite is a model for those who want an aerobatic plane with fantastic flying, aerobatic characteristics and also a likeable design. It has a wide speed range and pleasant flying behaviour, however Elite is intended primarily for advanced pilots. This model has almost all parts made from EPP foam, plexi cockpit.

Airframe is composed of counters, it's very tough and there is possible to use a wide range of components.

Model build time is approximately 1-2 hours.

The kit contains: assembled fuselage, a pair of wings, rudders, complete accessories needed to finish the model (wheels, levers ,etc.), A4 Printed manual and very detailed DVD video guide (construction Step-By-Step)

All parts are in the selected color treatment.
