

## DHK Wolf Brushed EP 4WD RTR incl. Akku und RC

---

**Art.Nr.:** C-DHK8133EU

By utilising many of the design features of the established 1/8th cars, the Wolf buggy offers the best combination of metal and plastic parts that deliver performance and durability without compromise on style. The oil-filled shock absorbers are spring pre-load adjustable and mounted to aluminium shock towers.

Throughout the fully ball-raced drive train, there are steel drive shafts and gears with a single plastic gear taking power off the drive pinion, exactly like the 1/8th versions. The toughness of the design is evident just about everywhere and that comes from extensive testing in the most rigorous of conditions.

Control comes via a frequency hopping, 2.4GHz 'pistol' style radio system that is ergonomic to hold and really easy to use. The smallest steering inputs are fully transferred to the car, giving you great 'feel' as your experience increases.

The fabulous grey/red colour scheme is pre-coloured onto the tough PVC body shell and will take an amazing level of abuse.

This version of the Wolf has a high-power, 550 class, brushed motor, matched ESC and a 6 cell 1800mAh Nimh battery plus mains charger to provide great performance and duration. If you need more batteries to prolong the fun, your local model shop will happily oblige. You can even get the Sigma EQ Mini charger as a great way of shortening the re-charge time. If you fit Nimh batteries in the transmitter it will charge those too.

Spezifikation			
<b>Länge:</b>	440mm (17.3")	<b>Höhe:</b>	166mm (6.5")
<b>Gewicht:</b>	3,000g (6.61 lb)	<b>Servos:</b>	1x 3kg Metal Geared Ballraced (Inc.)
<b>Fernsteuerung:</b>	2 Channel 2.4GHz (Inc.)	<b>Elektromotor:</b>	550 Class Brushed (Inc.)
<b>Gear Ratio:</b>	8.9:1	<b>Ground Clearance:</b>	25mm (0.9")
<b>NiCad/Ni-MH:</b>	7.2v 1800mAh NiMH (Inc.)	<b>Speed Controller:</b>	320A Brushed (Inc.)
<b>Wheel Base:</b>	290mm (11.4")	<b>Breite:</b>	256mm (10.0")
